Student Name: B Akshaya

Reg. No.:192424336

Course Code: DSA0216

Slot: B

Course Name: Computer Vision with Open CV for modern AI

Course Faculty: Dr. Senthilvadivu S and Dr. T Kumargurubaran

Smart Dermatology Assistant using AI and Image Processing

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

AI-based system used to detect and classify skin diseases from images.

Uses image processing and deep learning models like CNN.

User uploads a skin image through a mobile or computer.

Image is preprocessed and analyzed by the AI model.

System predicts the possible skin condition with confidence score.

Helps in early diagnosis, saves time, and supports doctors and patients.
